## JAPAN.

**Cholera and Plague on Steamships.**

Surgeon Irwin at Yokohama reports, September 5:

The steamship *Suma Maru*, from Shanghai, arrived in the harbor of Chinampo, northwest coast of Korea, August 26, with 2 cases of cholera on board. One case ended fatally August 27.

The steamship *Manchuria* arrived at quarantine at Yokohama August 31 with a case of plague on board. The case ended fatally on the same date. The patient was a Chinese who had embarked at Hongkong. The vessel was held in quarantine and released September 3. All on board were bathed and personal effects were disinfected. The steerage quarters were washed with carbolic-acid solution. The *Manchuria* sailed for Honolulu September 4 after a thorough examination. All steerage passengers and members of the crew were examined for glandular enlargement.

**Typhoid Fever and Dysentery.**

Sanitary conditions in Kanagawa prefecture, according to official reports, are in a most unsatisfactory state at present. Typhoid fever is on the increase, especially in the Odawara district. The number of cases now reported is 554, an increase of 181 over the highest of last year. In Odawara 190 new cases were reported in three days. The cases of dysentery, however, are less than the record for the same period of last year, the number of cases reported being 214 against 287.

The authorities are taking all the precautions possible to prevent any further spread of typhoid and dysentery.

## MEXICO.

**Yellow Fever at Campeche.**

The following information, dated October 1, was received from the president of the superior board of health of Mexico:

Three cases of yellow fever at Campeche. Suppressive measures are being taken.
